Team07 Meeting Minute

SOFTWARE ENGINEERING GROUP PROJECT

Supervisor: *RuiBin Bai*

Date	2021-12-02	Chairperson	YANG Jiun-Chi
Time	15:30~ 16:00	Secretary	PARK So-Young
Participant	CHO, In Jae (20212687) FANG, Yichu (20214756) LAU, Yik Lun Yelan (20217531) PARK, So-Young (20121536) YANG, Jiun-Chi (20215187) WON, Minhyeon (20314810)	Notes	6 out of 6 participated Absent: x Late: x

Topic	Requirement analysis & Interim report document feedback

Meeting Summary	
Content	**Issue/remarks**

1.Diagram
  - Include diagrams to show what is the focus of the job shop problem
    -What the team have: Use case diagram & sequence diagram to show methodology of how the system works
    -What is further needed: simple diagram to illustrate the problem; key issue, key object for reviewers who have little or no idea of the project+ background knowledge to have an instant understanding
- Industrial 4.0, how Aps works with big digital framework
    - The objective, constraints, etc.	

2.Document
  - Types of Job shop problem: put it in problem description part
  - Two or three formulations in extension of five types of problem, give users code template to change
     -For advanced functionality: users need to learn how to program
  - Need to be described: After problem is defined, script needs to be translated into the data format (ex>class) that could be an input of the algorithm to be computed directly.
	- Add more about job shop definition
	- What the supervisor thinks: Management<Actual implementation of Software engineering.
	    - think more about development

3. Further notice
  - Further questions could be asked through email or WeChat
  -Interim report could be sent to the supervisor before 12/06 for feedback (three days before the deadline)	

Task		
Content	**Charged Person**	**Due Date**

Next meeting	PMB425 Will be noticed later
